Welcome to the 1% Club! The account you'll be opening has consistently earned between 0.60% and 1.00% per day since inception.

The following instructions will guide you through the process to open, fund, and activate your account.

There are several steps to this process, and it is important to carefully follow these directions and take each step in order.

Do NOT move on to a new step until you are certain that the previous step has been completed correctly.

Failure to follow these steps may result in a loss of funds.

Cryptocurrencies are still an unregulated market. Your funds are not insured like they would be at a bank or traditional investment firm.

If you lose cryptocurrency into the internet void, it is virtually impossible to get it back.

As long as you follow these instructions, you should not have a problem. We have documented and tested this process to ensure you set up your account properly.

And if you have any issues along the way, we are here to help you.

During the account set up process, there will be several points where you'll need to write down and save specific passwords, usernames, and security phrases. It's a good idea to keep these all in one place, carefully labeled and recorded exactly as they are created.

For your convenience, we have provided a pdf you can print and use to record all the necessary pass codes and credentials. Copy them all down on this sheet and store it someplace safe.

Once filled out, we recommend that you also take a picture of this sheet and store it on your phone or computer as a backup.
